

std::true\_type

std::true\_type

Catch::true\_given< typename >

```
graph BT; A[Catch::true_given< typename >] --> B[std::true_type]; A --> C[std::true_type];
```

The diagram illustrates a relationship between three C++ type names. At the bottom, a box contains the text 'Catch::true\_given< typename >'. Two arrows originate from the top of this box: one points to the left and the other to the right. Each arrow then turns upwards to point at the bottom of a box containing the text 'std::true\_type'. There are two such boxes, one on the left and one on the right, both containing the same text.
