

Catch::ITransientExpression

Catch::ITransientExpression

Catch::MatchExpr< ArgT, MatcherT >

```
graph BT; A[Catch::MatchExpr< ArgT, MatcherT >] --> B[Catch::ITransientExpression]; A --> C[Catch::ITransientExpression];
```

The diagram illustrates a relationship between three classes. At the bottom is a box labeled 'Catch::MatchExpr< ArgT, MatcherT >'. Two arrows originate from the top of this box and point upwards to two separate boxes at the top, both labeled 'Catch::ITransientExpression'. This suggests that 'Catch::MatchExpr' is a specialization or inherits from 'Catch::ITransientExpression'.
