

Catch::MessageStream

```
classDiagram
    class Catch_MessageBuilder["Catch::MessageBuilder"]
    class Catch_MessageStream["Catch::MessageStream"]
    Catch_MessageBuilder --|> Catch_MessageStream
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Catch::MessageStream'. Below it, two boxes labeled 'Catch::MessageBuilder' are positioned side-by-side. A horizontal line connects the two 'Catch::MessageBuilder' boxes, and a vertical line with an upward-pointing arrow connects this line to the 'Catch::MessageStream' box, indicating that both 'Catch::MessageBuilder' classes inherit from 'Catch::MessageStream'.

Catch::MessageBuilder
